## PROFESSIONAL EXPERIENCE

Front End Developer Intern

*Super Code Design , Bangalore*

onsite

May 2024-June 2024

- ✓ WordPress **live client project**
- ✓ Backend development **using PHP**
- ✓ Implementing **SEO tools**
- ✓ Designing with **HTML and SCSS**

Mean Stack Developer Intern

*Arya Drj Technologies, Bangalore, India*

Onsite

June 2023-Jan 2024

- As a **Mern stack developer at AD Technologies in Bangalore, India** I have gained significant experience working on various projects using the MERN stack.
- My role has involved engaging with a diverse set of technologies and collaborating with cross-functional teams to create customized **web solutions**.
- The **dynamic environment at AD Technologies has provided me with a robust learning experience**, further sparking my passion for web development and driving me to deepen my expertise in the field.

Software Developer Intern

*Exedra Private Limited, Bangalore, India*

Onsite

Sep 2022 - Nov 2022

- Developed and maintained **web applications with HTML, CSS** resulting in a significant **increase in user engagement**.
- Conducted code reviews to improve team productivity and code quality, fostering a culture of **excellence and continuous improvement**.

## Project

Health & Wellness Tracker

- Designed and built a health and wellness tracker application using **MEAN stack (MongoDB, Express.js, React, Node.js)** to help users monitor their **fitness goals and lifestyle habits**.
- Implemented features such as user registration, activity logging, progress tracking, and data visualization using **charts and graphs**.

Interview Preparation Job Site

- Developed an **interactive web application** for job interview preparation, **using React.js as the frontend framework**.
- Utilized React **DOM** to efficiently manage and render React components, ensuring a **smooth user experience throughout the application**.

Task Management System

- Created a task management system with a focus on team collaboration Utilized the **Flask framework with a MongoDB database to create a robust backend in Python and front React.js**
- Implemented features such as **task creation, assignment, progress tracking, and deadline reminders**.

MERN CRUD Application

- Developed a full-fledged **CRUD application with MongoDB, Express, React, and Node.js**.
- Utilized Express to build a **RESTful API for CRUD operations** on user data.
- Implemented **comprehensive Jest tests** to validate component functionality and overall application reliability.
- Created a robust **user model with fields like name, email, age, address, and password**.
- Integrated CORS and middleware for JSON parsing** in the Express application.
